Golden Sea Lighted Up 5th China - South Asia Exposition and 25th China Kunming Import & Export Fair

From June 14th -20th, the 5th China - South Asia Exposition (hereinafter referred to as the Expo) and 25th China Kunming Import & Export Fair (hereinafter referred to as the Kunming Fair) were hosted in Kunming. Golden Sea offered a selection of key products including LED profile GL6, spot G9B, profile V3000P while World Truss Company offered HT34 series to the venue, whose excellent performance with ultra brightness, strong stability and high efficiency ensure the perfect opening ceremony. On the first day of the ceremony, Hu Chunhua, the member of the political bureau of the CPC central committee and vice premier of the state council, were present and delivered speech at the ceremony.

This Expo was jointly hosted by the Ministry of Commerce of China and the People's government of Yunnan province, and co-organized by ministry departments of south-Asian countries. The Kunming Fair was jointly held by the Ministry of Commerce of China and the local governments of Yunnan, Chongqing, Guizhou, Guangxi, Tibet and Chengdu, and coordinated by the organizations at home and abroad. The exposition is so far the largest international exposition held in Yunnan after the 19th National Congress of the Communist Party of China in the meaningful year of the 40th anniversary of China's opening-up and reform. During the exposition, about 7000 persons, who are ministry level officials, representatives of international organization, foreign diplomats, business leaders, renowned experts and important guests from 87 countries and regions, have participated in the activities and events aiming to further broaden the channel and field of economic and trade cooperation and deepen the economic exchange between countries and regions.

In the exposition, Golden Sea provided the venue with LED profile GL6, which became the highlight of its kind. It uses 600W white light LED source to replace traditional 1500W short arc light source, which is the milestone in high output LED lighting. It is innovative product in traditional field, making

technological breakthrough in frontier domains and embodying the progress achieved by Golden Sea with its R&D strength.

This fixture was awarded with New Product, Technology and Application prize in 2016 BIRTV. Experts regard it as a professional lighting fixture with high brightness, low power consumption and maintenance cost.

GL6 profile

GL6 uses 600W white light LED module as light source, with Ra ≥80, the fixture adopts highly efficient system, using warm pipe cooling technology plus optimized design of in-take, venting, air guiding components to control the temperature down to less than 50°C, los noise to about 40dB and light source life span to more than 20000 hours. In standby state, the light source totally stops working to reach the real light source “ zero output ” .

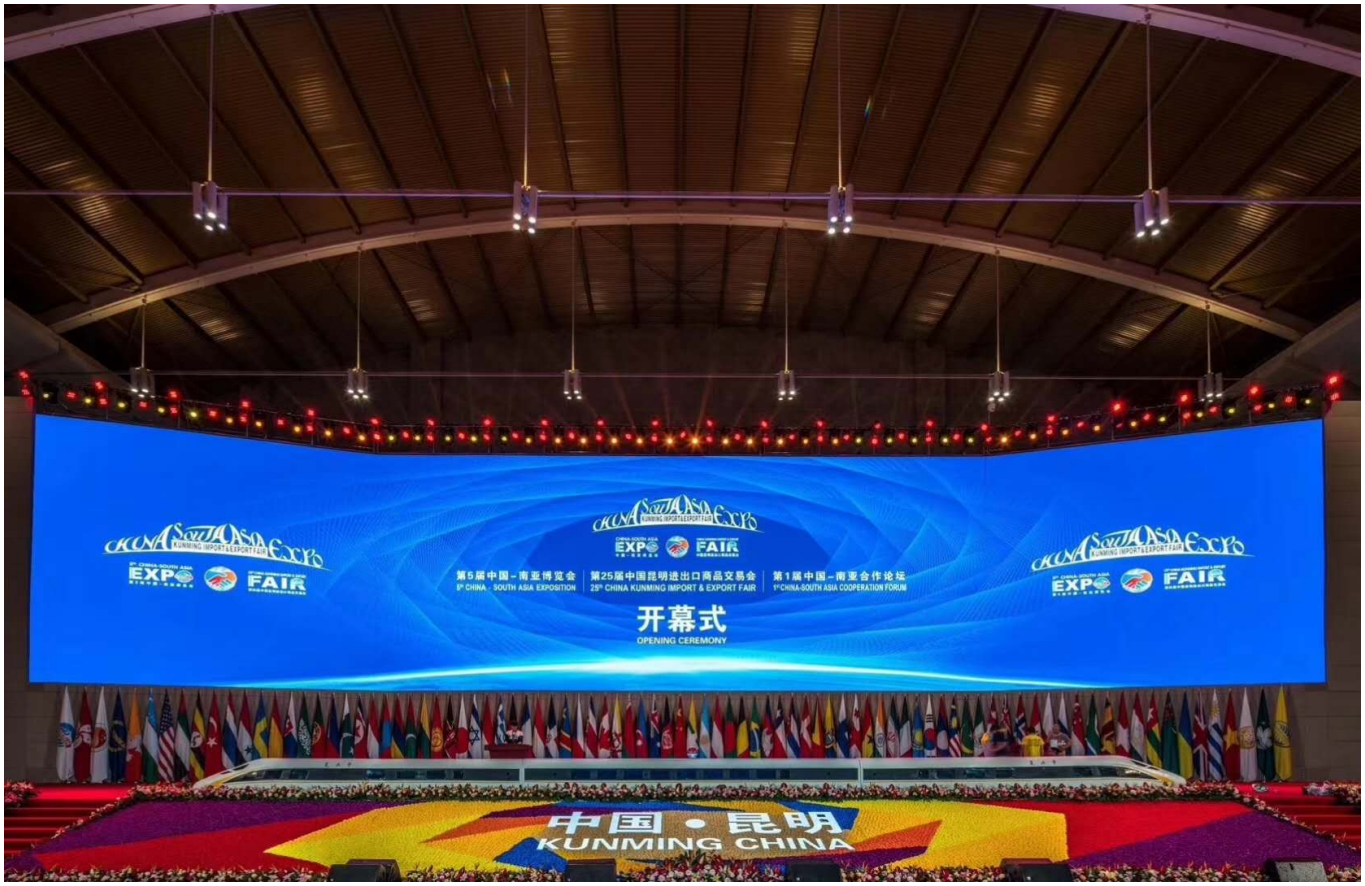

0-100% linear dimming and 0-100% linear frost, four blades constitute the framing system with each blade able to move to the end, resulting in any precise framing light spots. The maximum output of the fixture is only 800W with effective lumens as high as 25000lm.

products involved

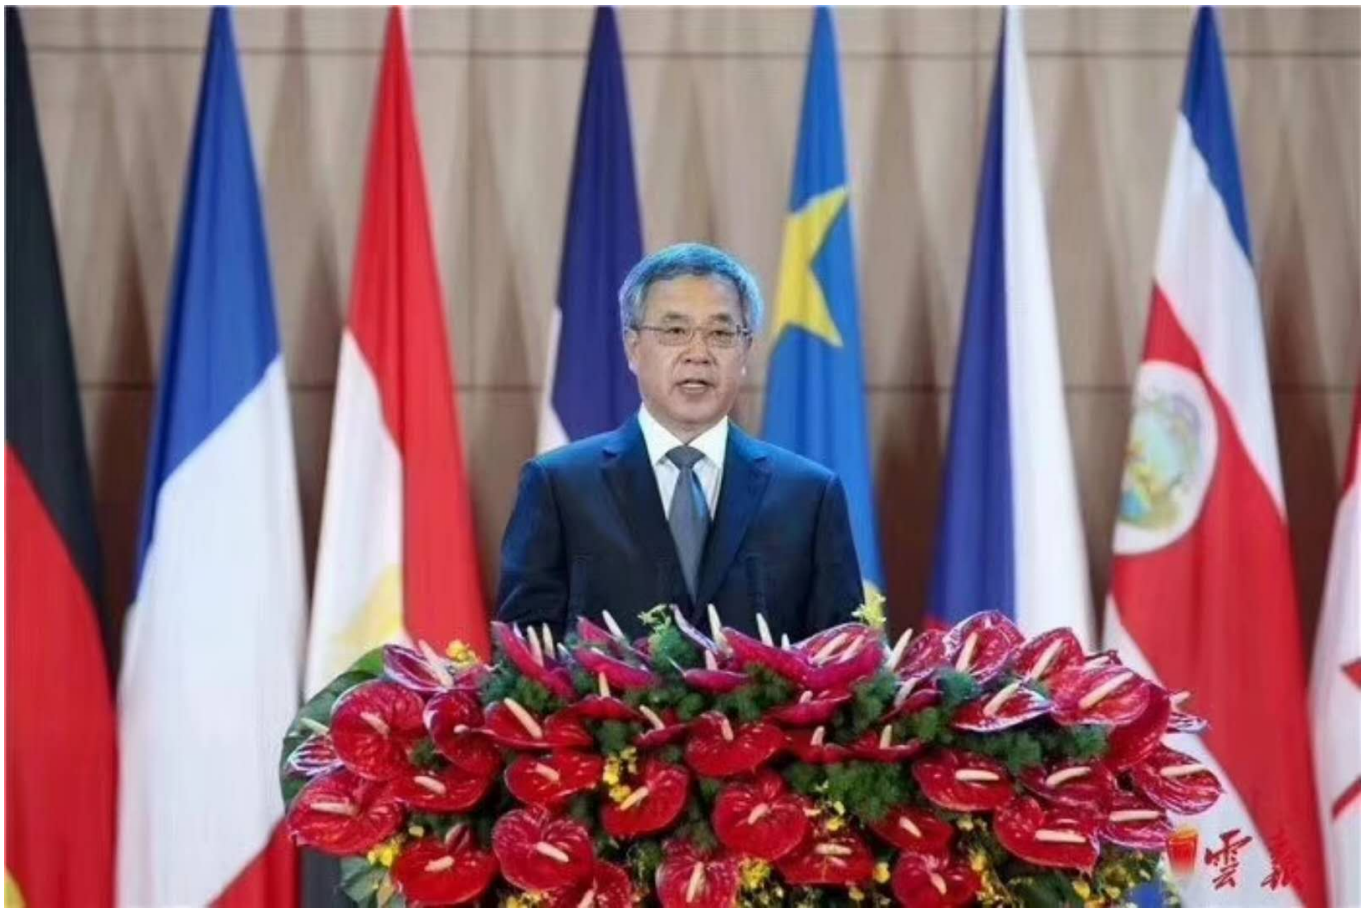

- GL6
- G9B
- V3000P
